OPEN JOURNAL  
SYSTEM

**Installation Manual**

Open Journal Systems (OJS) is an editorial workflow platform and system for online publication. The StrikePlagiarism plug-in created for the OJS System allows users to send documents for antiplagiarism analysis and receive a Similarity Report directly through the user's OJS account.

The plugin we have made available works with OJS version 3.3.1.0 and newer.

# 1. Installation of the plugin

StrikePlagiarism.com customer Service provides a .rar file, which contains a plug-in file and an instructions in English. Installation can be done in two ways:

*1. you need to copy the contents of the plugin to the plugins / generic / plagiarism folder.*

To do this you need to create a folder plagiat (for example: *mkdir plagiat* and then use *git clone <repo\_url>* or *git clone <repo\_url > plagiarism* and the folder will be created).

Then you should run the command *php tools / upgrade.php upgrade* from the OJS root directory.

*2. download the plugin and install the downloaded file via the website, by going to:*

Administration -> Site Settings - under Plugins - you should click upload a new plugin in the next step you need to upload the downloaded file and install it, then run the command `php tools / upgrade.php upgrade` from the OJS root directory.

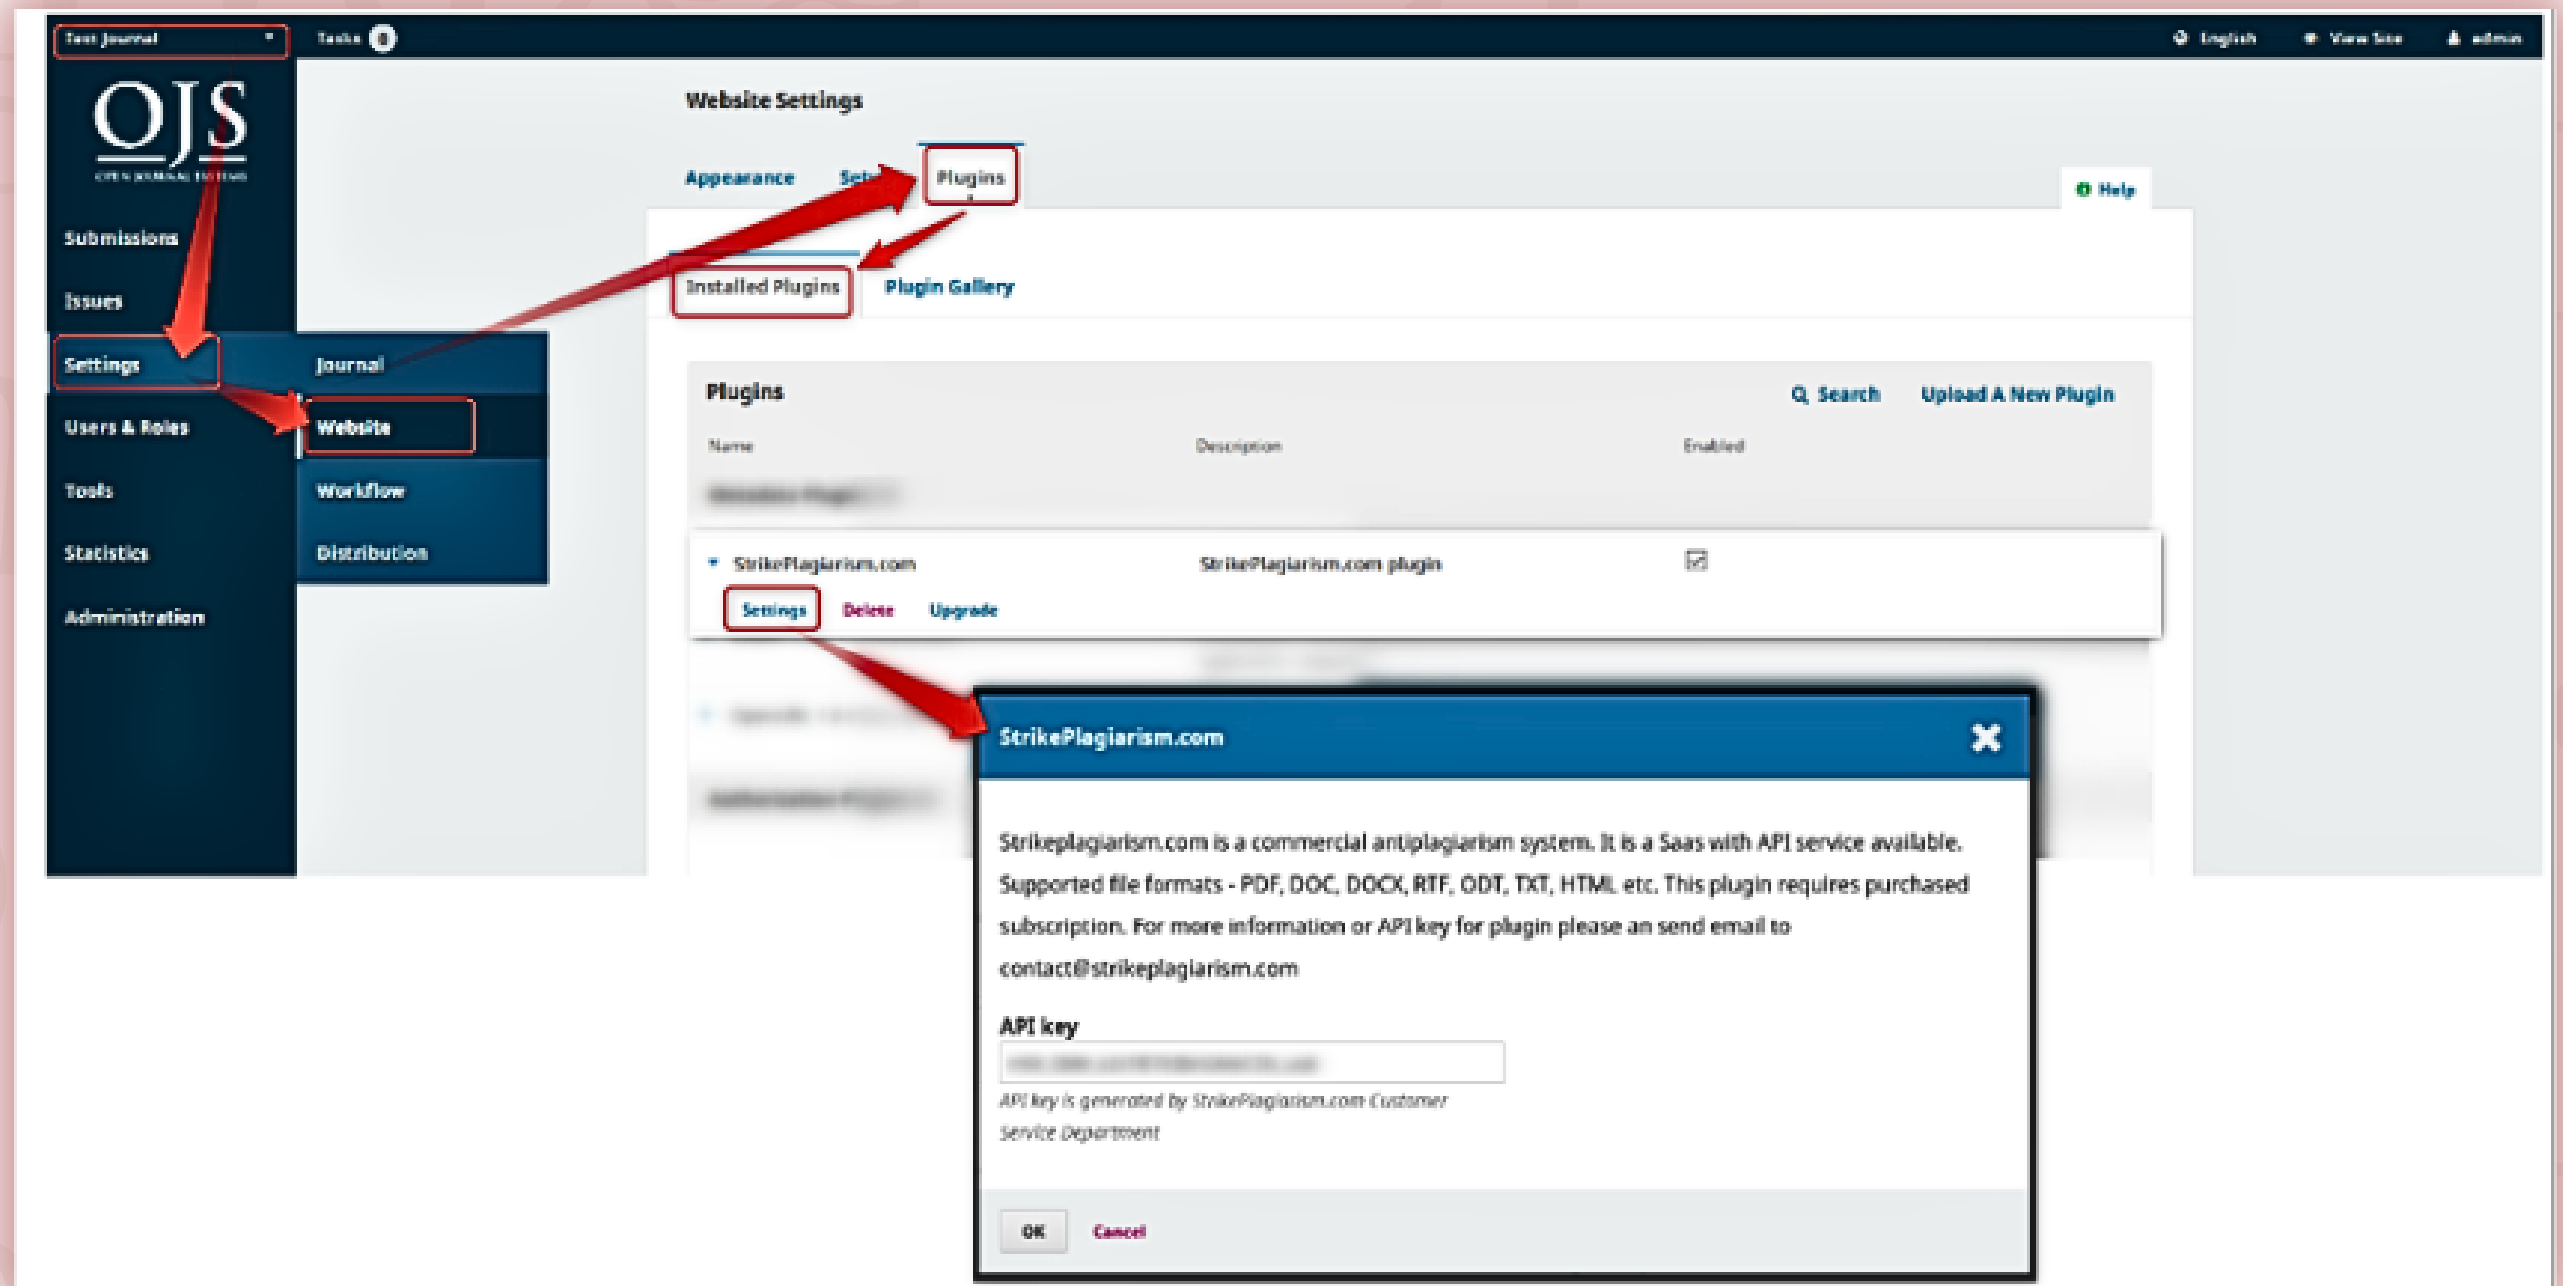

Then, in Administration -> Site Settings - in the Plugins tab, activate the installed plugin (refresh the page if necessary).

The screenshot displays the OJS administration interface. On the left, a dark blue sidebar contains the 'Administration' menu, which is highlighted with a red box. A red arrow points from this menu to the 'Site Settings' option in the main content area. Another red arrow points from 'Site Settings' to the 'Plugins' tab within the 'Settings' section. The 'Plugins' tab is also highlighted with a red box. Below the tabs, a table lists installed plugins. The 'StrikePlagiarism.com' plugin is highlighted with a red box, and its 'Enabled' checkbox is checked.

Name	Description	Enabled
StrikePlagiarism.com	StrikePlagiarism.com plugin	<input checked="" type="checkbox"/>

## 2. Plugin configuration

In order to use the plugin properly, after installing it, you need to enable it in the admin account in OJS for a particular journal under Settings - \> Website, under Plugins- In the Installed Plugins list, you will see the plugin in Strikeplagiarism.com.

The screenshot displays the OJS (Open Journal System) admin interface. On the left, a dark sidebar contains navigation options: Submissions, Issues, Settings, Users & Roles, Tools, Statistics, and Administration. The 'Settings' option is highlighted, and a sub-menu is open, showing 'Journal', 'Website', 'Workflow', and 'Distribution'. A red arrow points from 'Settings' to 'Website'. The main content area shows 'Website Settings' with tabs for 'Appearance', 'Plugins', 'Installed Plugins', and 'Plugin Gallery'. The 'Plugins' tab is active, displaying a table of installed plugins. The 'StrikePlagiarism.com' plugin is listed with a checked 'Enabled' box and a 'Settings' button. A red arrow points from the 'Settings' button to a modal dialog box titled 'StrikePlagiarism.com'. The dialog contains the following text: 'Strikeplagiarism.com is a commercial antiplagiarism system. It is a Saas with API service available. Supported file formats - PDF, DOC, DOCX, RTF, ODT, TXT, HTML etc. This plugin requires purchased subscription. For more information or API key for plugin please an send email to contact@strikeplagiarism.com'. Below this text is an 'API key' input field and a note: 'API key is generated by StrikePlagiarism.com Customer Service Department'. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

The API key (required for operation of the plug-in), which was sent to you by us should be entered in the plugin settings. After completing above mentioned steps the plugin will be correctly configured, and users will be able to send documents from OJS to anti-plagiarism analysis.

Thank you!
